

SOLUTIONS

TREE WATERING BAG

A slow release watering bag that is perfect for newly planted or established trees from a minimum of 1 inch to a maximum of 8 inches in trunk diameter, with branches beginning at least 25 inches from the ground or higher.

Heavy-Duty
Slow Release

20 GALLON
BAG

 LIFT TAG TO FILL BAG WITH WATER

WATERING BAG INSTRUCTIONS

- Place around tree trunk and wrap both sides around trunk until zippers meet. Zip together from bottom to top.
- Insert hose into fill opening and begin filling with water.
- Fill bag to 1/4 capacity. Drip points may squirt initially, but will slow as bag is filled.
- Gently lift up on straps at top of bag to expand bottom. Add pre-mixed water-soluble fertilizer, if desired. Resume filling.
- Fill to desired level. Bag will be empty in approximately 8 to 10 hours.
- Watering schedule for most new tree plantings is once per week.

USE CONSIDERATIONS

- Use clean water only.
- Do not suspend or hang bag from black handles.
- Do not use black handles to adjust bag when full.
- Do not unzip or transport bag when full.
- The Solutions Watering Bag is not intended as a permanent installation. Use as needed for 1 to 2 growing seasons.
- Keep away from children.
